

Torch of Peace
Message to Idaki Shin

I run short of expression to describe my appreciation and inner delight to the conductor and organizer of Torch of Peace Tanzania Concert. This is indeed a continuation in the process for search to peace and stability that have been already started few years ago using the musical sound created provisionally. This process reached its climax when the 1st great concert was staged under the theme of "Cosmic Manifesto" in Addis Ababa, the capital of African diplomacy in the presence of around 100,000 audiences in the open air.

No doubt, the Torch of Peace Tanzania Concert, would serve though in a modest way the concern and serious attention of the international community for the plight of Africa for peaceful life in this world which is full of problems.

Therefore, may I take this opportunity to congratulate Mr. Saito, the great teacher who calls for peace and tranquility and request him to continue his effort. Moreover, I would also like to praise Miss K. Koma in particular and the entire management in general for the relentless contribution to the success of this concert.

In conclusion, I simply say viva, Tanzania Concert "Torch of Peace" and long live the spirit and brotherhood among the people of world and that of Africa and Japan which have been torched by Idaki Shin.
